

Carbon Reduction Plan

Supplier name: **VEV Services Limited**

Publication date: **May 2025**

Commitment to achieving Net Zero

VEV Services Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline and Current Reporting Year: 2024	
<i>As this is VEV's first Carbon Reduction Plan, current emissions reflect the baseline year of 2024.</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	2,021
Scope 2	982
Scope 3	10,087
Total Emissions	13,070

Emissions reduction targets

To continue progress toward Net Zero, VEV Services Limited commits to:

- Annual measurement and reporting of Scopes 1, 2, and relevant Scope 3 emissions.
- Develop a pathway to reducing UK emissions whilst at the same time growing our business - which reduces emissions from our customers' businesses - based on a KPI relative to 2024 baseline to enable progressing to Net Zero by 2050.

Carbon Reduction Projects

Current Measures Implemented

VEV’s business model is to enable our customers to switch to electric vehicles and stop using diesel, by providing end to end charging solutions. In addition this:

- All VEV maintenance is carried out by engineers using electric vans, reducing Scope 1 emissions.
- VEV has achieved ISO 14001 certification, reflecting our structured commitment to environmental management.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Customer decarbonisation: VEV will continue to help customers reduce their carbon footprint through delivery of electric vehicle charging solutions.
- Data Quality: VEV will enhance emissions data quality and monitoring, with a specific focus on Scope 3 emissions.
- Supply Chain Engagement: We will collaborate with suppliers and partners to develop strategies for reducing shared environmental impact.
- Operational Improvements: Internally, we will develop initiatives to:
 - Increase use of renewable energy
 - Minimize environmental impact from site builds
 - Promote sustainable practices in daily operations

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
